Medication Therapy Management Service

Medication Therapy Management (MTM) is a distinct service that pharmacists provide to help optimize drug therapy and improve therapeutic outcomes for individual patients. MTM services are independent of, but can occur along with, the dispensing of a medication at the pharmacy. MTM includes a broad range of professional activities and responsibilities within the licensed pharmacist's scope of practice. These MTM services provided by a pharmacist include, but are not limited to, the following:

- Assessment of the patient's health status
- Performing a comprehensive medication review to identify, resolve and prevent medication-related problems
- Reduce risk of adverse events/ side effects
- Develop medication treatment plan
- Monitor and evaluate the patient's response to therapy, including safety and effectiveness
- Provide verbal education and training designed to enhance patient understanding and appropriate use of his/her medications
- Work with other healthcare provider to help optimize medication regimens

Personalized Session to Fit Your Needs

At Kings Pharmacy you can schedule an appointment that works best for your schedule and you will be provided with a one on one session with a licensed pharmacist ready to take care of your medication needs. At this visit, you will receive an in dept personalized medication counseling session with the best tips relevant to your home medication regimen. You will also be provided with a personalized list of your medication for your own record and use. We encourage you to bring in all of your medication bottles and pill boxes from home and ask any questions you may have.
