Dear provider,

Many insurance companies are requiring extensive documentation be provided for approval of Hepatitis C medications. Although some prior authorization forms require more than others, we ask that you please be sure to provide the following documentation for each new Hepatitis C patient to ensure your patient's PA gets completed as quickly as possible:

- Original Rx
- Patient demographics
- Prescription insurance coverage information (copy of insurance card) and social security number
- Treatment history and outcome, including medications tried and failed
- Updated lab work (within 30 days)
  - Genotype
  - Viral load
  - CBC
  - CMP (including GFR and liver panel)
  - INR
  - Urine drug screen
- Documentation of fibrosis staging or cirrhosis (i.e. FibroSure, FibroScan, liver biopsy)
- NS5A polymorphism test (ONLY required for genotype 1a patients when prescribing Zepatier)
- Recent chart note (with Child Pugh score documented or presence of compensated/decompensated liver disease)
- Letter documenting patient's willingness, readiness and ability to adhere to the full prescribed regimen

Sincerely,

Kings Pharmacy
